PROFILE

I am passionate about problem-solving with JavaScript and creating a compatible webpage with a good user interface/experience. I can adapt to complex working firms, quick learner and deliver within time frames.

I aim to consistently deliver products with a grit mindset and commitment to successful teamwork.

PROJECTS

Voting Site, Developed with React.

Implemented a combination of state with useReducer and good SEO. ☑

Open-Source Software, GitHub ☑

Designed a simple open-source project to help beginners and even experienced programmers find solutions to some of the most common OSS beginners' problems.

API Fetch, randomuser.me API ☑

Created a client-side pagination using Axios to fetch the randomuser.me API. Implemented accessibility disabled state and API loading state. Used react and CSS to setup the project.
